Bristol University: Department of Social Medicine

The University of Bristol Department of Social Medicine conducts teaching and research in aetiological epidemiology, health services research, and public health medicine.

<http://www.epi.bris.ac.uk/>

Bristol University: Department of Primary Health Care

The Academic Unit of Primary Health Care conducts high quality research within a number of themes relating to primary care and provides teaching throughout the medical undergraduate curriculum.

The Academic Unit of Primary Health Care is a multidisciplinary group, including academic health professionals, namely GPs and nurses, as well as health service researchers from a variety of backgrounds and administrative support staff. We contribute to primary health care locally through involvement with Primary Care Trusts in Bristol, and nationally through our work with research organisations, professional bodies and funding bodies. All of our work is designed to benefit patients and the NHS.

Teaching

The Academic Unit of Primary care delivers part of the undergraduate curriculum and supports a large number of GPs who teach medical students in the community. Primary Care supports its GP teachers through regular study days spread through the year and more recently with the introduction of a 2 day introductory course for new GP teachers. If you have an interest in teaching and would like to find out how to get involved visit the website or contact sally.sterland@bristol.ac.uk
